SUMMARY

Motivated Computer Science & Engineering undergraduate with hands-on experience in Full-Stack Development (MERN) and AI/ML solutions. Proven track record of improving workflow efficiency by 30% through automation and delivering scalable web applications. Proficient in Java, Python, and JavaScript, seeking a challenging role to leverage technical expertise in software development.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks/Libraries: React.js, Node.js, Express.js, Streamlit, Material UI, Folium

Databases & Tools: MongoDB, MySQL, PostgreSQL, Git, GitHub, VS Code, Postman, Linux

Concepts: Data Structures & Algorithms, REST APIs, NLP, Authentication (JWT), RBAC

EXPERIENCE

Software Engineer Intern

Oct 2025 – Nov 2025

Bluestock™

Remote

- Developed and maintained the Company Registration & Verification Module using ReactJS, Node.js, and PostgreSQL.
- Implemented multi-step registration, dashboard management, and secure JWT/Firebase authentication.
- Integrated Cloudinary for company logo/banner storage and implemented responsive UI for mobile and desktop.
- Collaborated with cross-functional teams, conducting API testing and debugging to deliver milestones on time.

Full-Stack Development Intern

Sep 2025 – Oct 2025

VaidSys Technologies

Remote/Hybrid

- Architected scalable full-stack modules using React.js, Node.js, and MongoDB, ensuring high performance.
- Enforced secure JWT-based authentication and Role-Based Access Control (RBAC) to protect user data.
- Crafted responsive UI components using Material UI, improving user engagement and accessibility.
- Constructed and integrated RESTful APIs with the frontend using Axios for seamless data flow.

PROJECTS

Online Learning Management System (LMS)

MERN Stack, Socket.io, JWT

Full-Stack Project

- Engineered a comprehensive LMS with distinct dashboards for Students and Instructors, supporting course creation.
- Orchestrated real-time features including notifications and progress tracking using Socket.io.
- Fortified user sessions with JWT authentication and password hashing, ensuring data integrity.

Question Paper Generator

Python, Streamlit, NLP, LangChain

AI/ML Project

- Devised an AI-powered tool leveraging NLP to generate questions based on Bloom's Taxonomy cognitive levels.
- Embedded PDF export functionality and dynamic input fields, streamlining the exam creation process.
- Deployed the application on Streamlit, providing an accessible and user-friendly interface for educators.

AI Traveller

Python, Folium, APIs

AI/ML Project

- Spearheaded development of an intelligent travel planner generating personalized itineraries based on budget.
- Harnessed multiple third-party APIs for real-time hotel booking, weather data, and mapping services.
- Integrated multilingual support and voice recognition to enhance accessibility for diverse users.

EDUCATION

Quantum University

Aug 2022 – Jun 2026

Bachelor of Technology in Computer Science & Engineering

Roorkee, India

First Step School

2021

Class XII (CBSE)

Chhindwara, MP

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Python for Everybody (Coursera), Java Programming (Udemy)

Hackathons: Participant in HackIndia 2025 (National Level) and various university-level hackathons.

Impact: Increased codebase of internship project by 10% through proactive feature additions.
